SOURCE

Bomb releasing was practiced over the KAISERSTEINBRUCH (P 48/A 67) bombing practice ground. Three twin-engine aircraft, whose type could not be determined because of the distance, approached the target in level flight three times at an altitude of about 6,600 feet. They released a total of six bombs each time, as was determined from the number of detonations heard.

25X1A [REDACTED] Comment:

This is the first information on the existence of a bombing practice ground on the KAISERSTEINBRUCH troop training grounds.

This document is hereby reclassified to **CONFIDENTIAL** in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
